Specialty Rotation 1 - Two-month Record

Experiment 3 - Practical Notes

Name: _____ Roll no.: _____ Date: _____

Aim

To complete and document the specialty rotation 1 - two-month record internship activity.

Principle

A specialty rotation applies clinical pharmacy services to the actual assigned department, with objectives appropriate to its patients and medicine-use processes.

Requirements

- Institution-approved rotation plan and clinical service procedures.
- Allocated patient/ward records accessed with permission, activity log and preceptor.

Procedure

1. Name the department

Enter the institution-assigned specialty, preceptor and dates; this guide does not preselect a specialty.

2. Map needs

Identify common clinical problems, high-risk medicines and department-specific monitoring or protocols.

3. Agree objectives

Set case, medicine-review, counselling and communication goals with the preceptor.

4. Provide and follow services

Record actual cases, pharmacy assessments, team decisions and monitored outcomes.

5. Complete review

Summarise learning, unresolved competency needs and the authorised end-rotation evaluation.

Observations and Record

Record item	Entry
Assigned specialty / dates	_____
Clinical service objectives	_____
Cases / assessments	_____
Accepted actions / outcomes	_____
Preceptor evaluation	_____

Result

Activity / date: ____. Work completed: ____. Preceptor feedback: ____. Follow-up: ____.

Precautions

- Enter only work actually performed; leave supervisor verification and certification fields for the authorised person.
- Use coded cases and protect patient privacy.
- Escalate urgent clinical issues through the treating team and follow the institution-approved responsibilities.

Viva Questions and Answers

1. Why maintain a verified work record?

It documents the activity, competency and feedback required for assessment.

2. What supports a clinical recommendation?

Current patient findings, suitable medicine information and a clear rationale within the approved clinical role.
