D.PHARM • FIRST YEAR

Social Pharmacy

CHAPTER 5

# National Health Programs in India

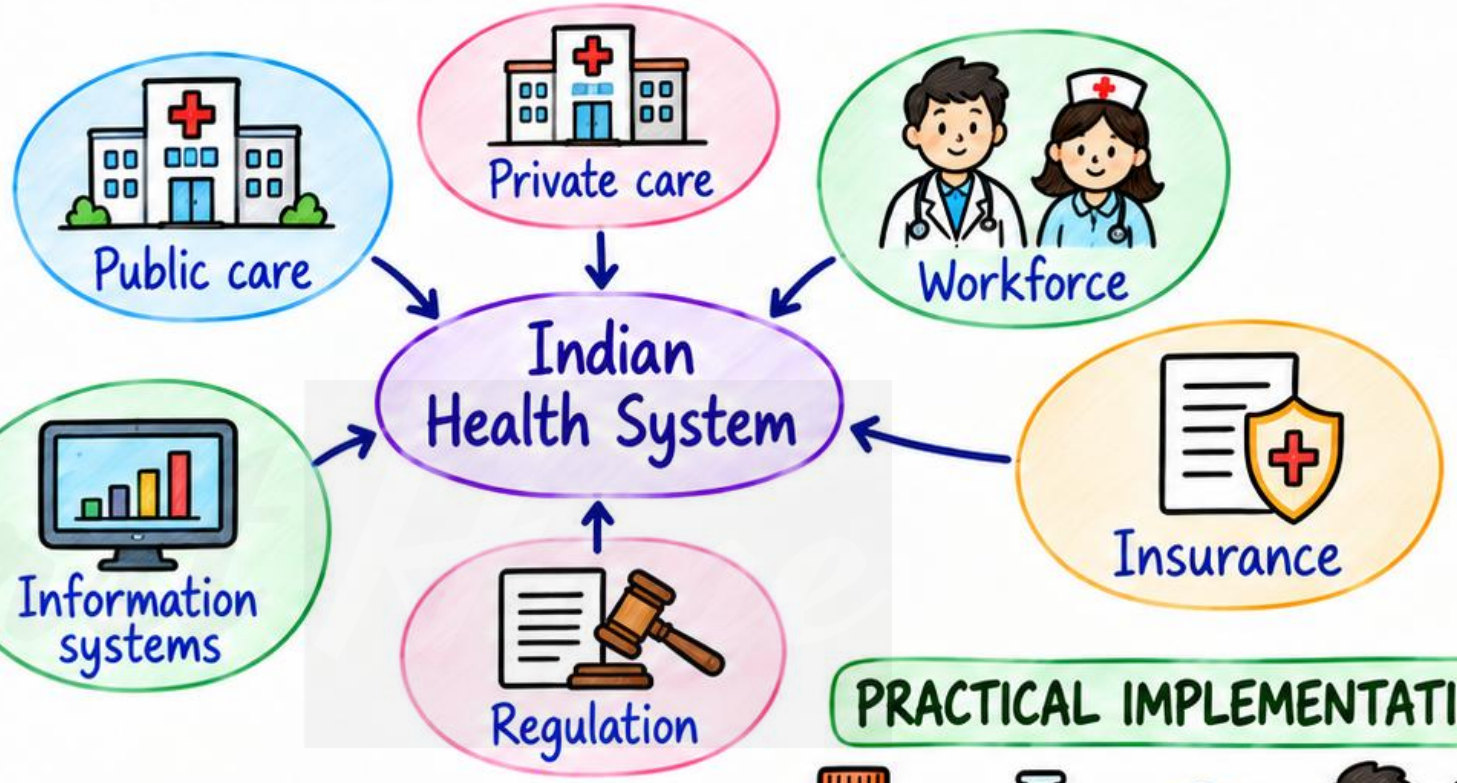

ENGLISH CHAPTER NOTES

DIPLOMA IN PHARMACY

# India's Health-System Building Blocks

## OVERALL SYSTEM

The Indian health system combines public and private care, workforce, insurance, regulation and information systems.

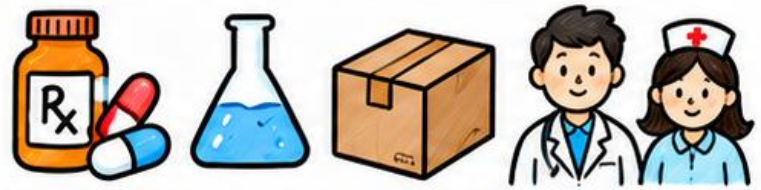

## SERVICE NETWORK

Primary, secondary and tertiary services should form an accessible referral network.

## PRACTICAL IMPLEMENTATION

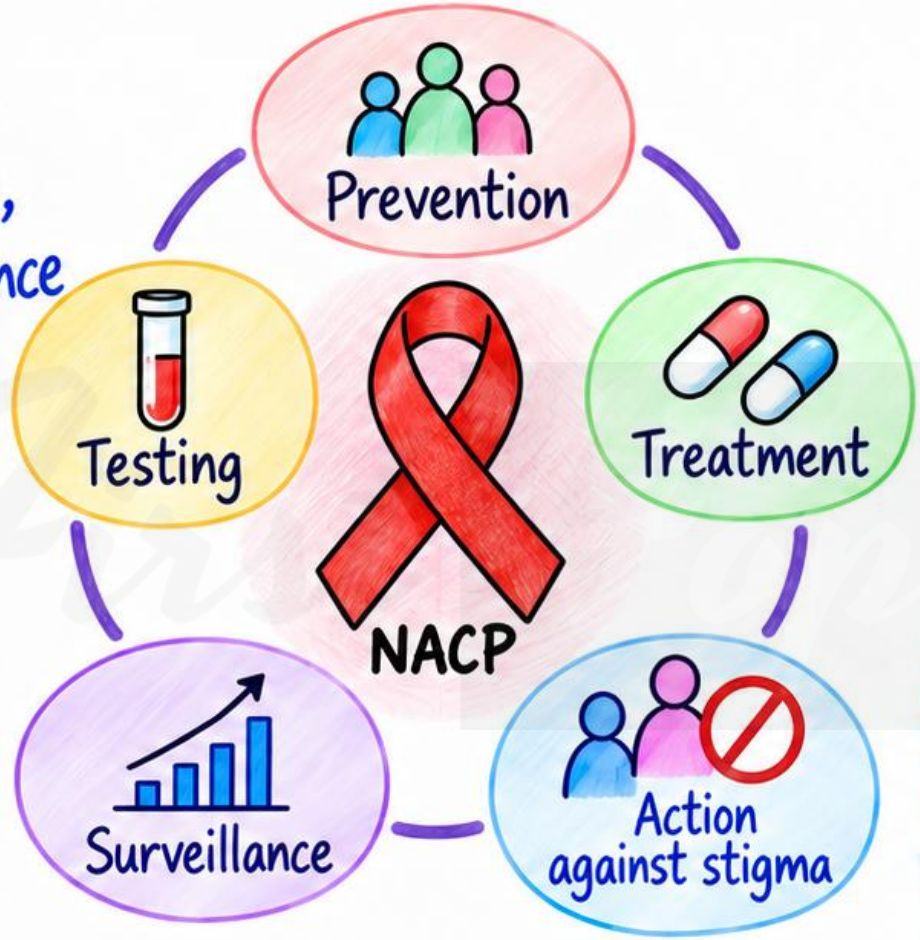

Essential medicines, laboratories, supply chains and trained personnel determine whether programmes work in practice.

# National AIDS Control Programme

## NACP

NACP combines prevention, testing, treatment, surveillance and action against stigma.

## ART

ART supports people living with HIV; continuity, adherence and interaction checks are practical pharmacy priorities.

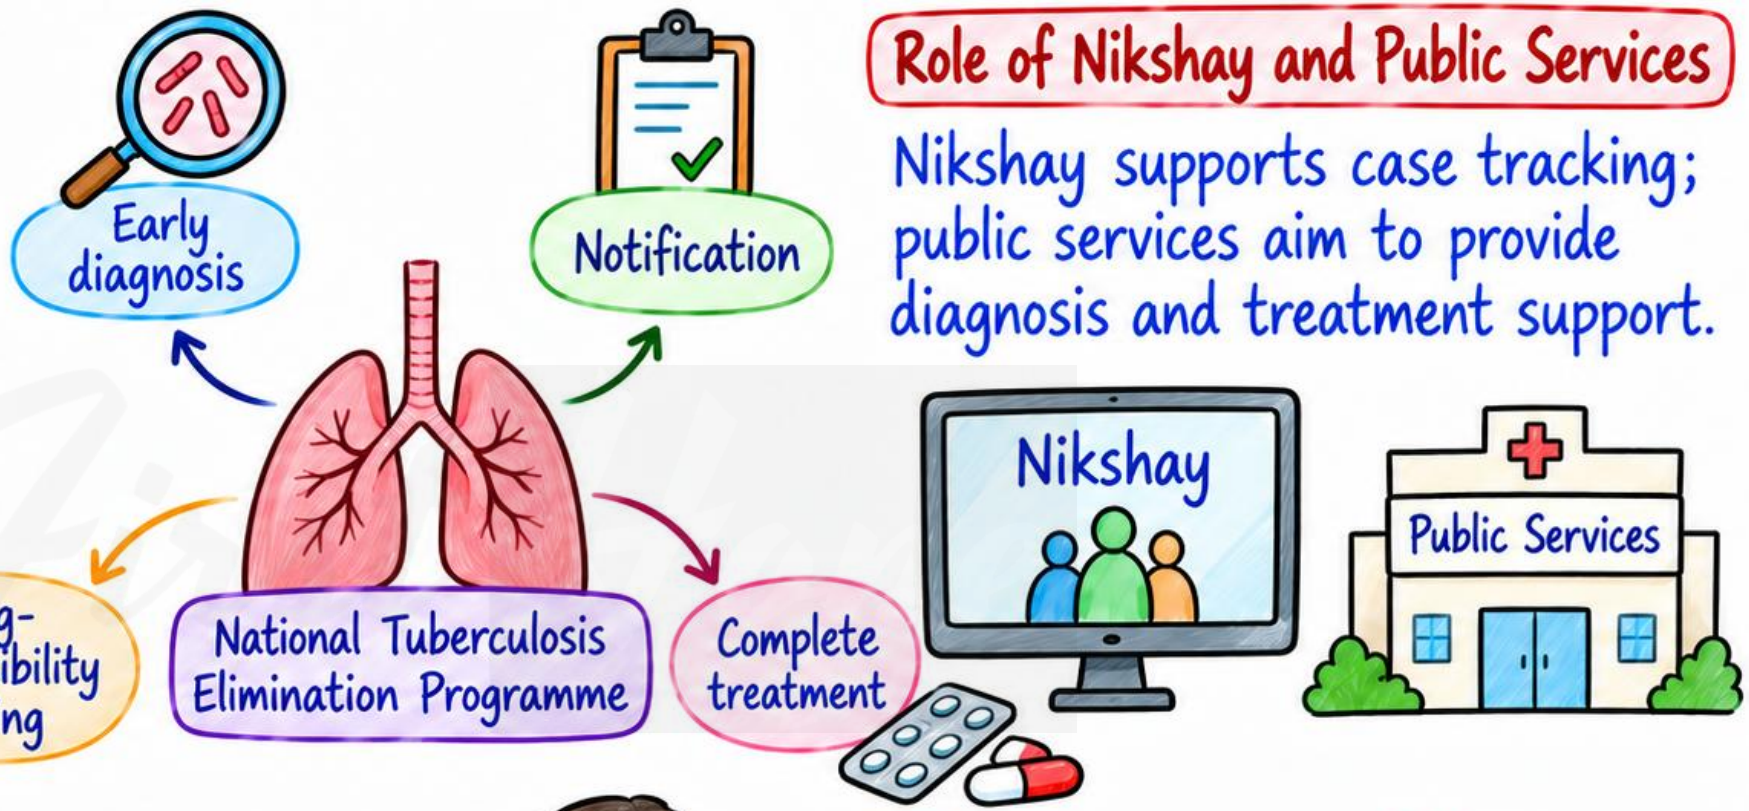

## GUIDANCE

Use current programme and treatment guidance; the source's phase and date labels are historical, not timeless facts.

# National Tuberculosis Elimination Programme

## NTEP – What it Means

The former RNTCP is now NTEP, emphasizing early diagnosis, notification, drug-susceptibility testing and complete treatment.

## Role of Nikshay and Public Services

Nikshay supports case tracking; public services aim to provide diagnosis and treatment support.

## Role of Pharmacists

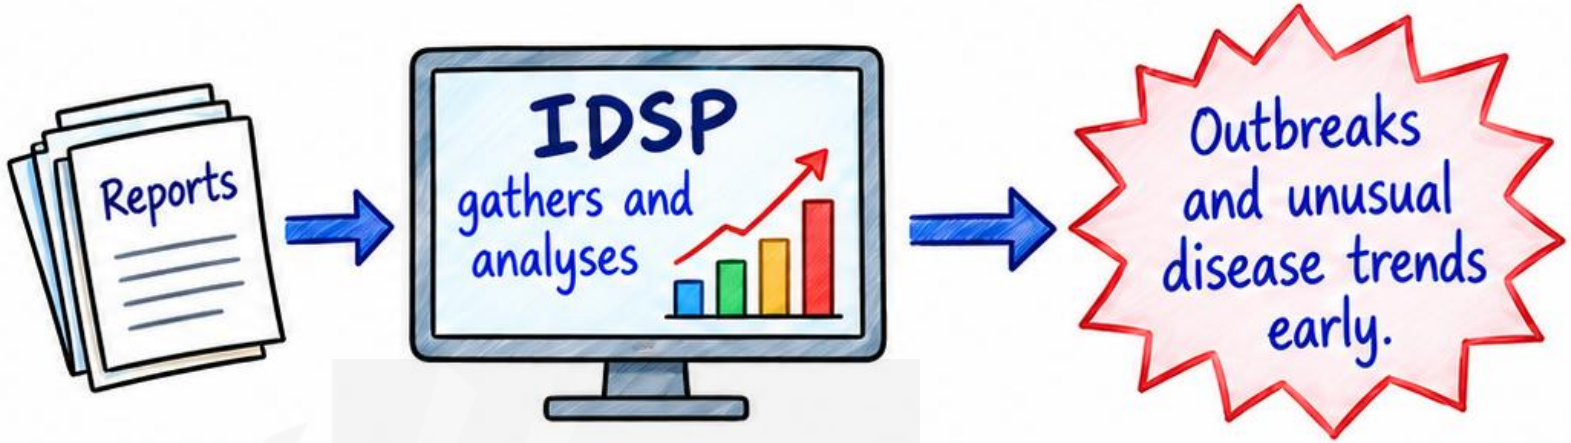

Pharmacists reinforce adherence and monitor adverse effects; the 2025 elimination date was a target, not a confirmed outcome.

# Integrated Disease Surveillance Programme

## WHAT IS IDSP?

IDSP gathers and analyses reports to spot outbreaks and unusual disease trends early.

## SUPPORT AND INVESTIGATION

District and state laboratories, surveillance teams and rapid response mechanisms support investigation.

## ROLE OF PHARMACISTS

Pharmacists can notice unusual demand, educate the public and report through the appropriate local channel.
