# Internship and Residency

## Clinical Training

- Patient care in cooperation with patients, prescribers and an interprofessional healthcare team, based on therapeutic principles and evidence-based data.
- Legal, ethical, sociocultural, economic and professional issues affecting therapeutic outcomes.
- Use of healthcare resources to promote health and support safe, accurate and timely medication distribution.
- Health improvement, wellness and disease prevention in patients, communities and at-risk populations.
- Monitoring national health programmes and schemes for preventive and promotive healthcare.
- Leadership and effective participation in the healthcare team.
- Communication with patients and the community.
- Clinical pharmacy services in General Medicine and other speciality departments.
